The Coffee Bean

Wiki Wiki woo!

Have you been looking on the internet? Look again! Go to the Coffee Bean's new website at the coffeebean.wikispaces.com. If you didn't get the hand out issues you can check here to see them, there's more then just news! go to WES and vote, remember to type in your classroom and you might get prize. We can't give you guarantees but we'll try!

Also, we want 1 more person for the coffee bean! If you go to the website and go to job appliances then answer the questions on a piece of paper and hand it in, the first one will be in the coffee bean! You can hold discussion by click on discussion at the top of the page and we'll try to answer as soon as possible.

Check out our new website, don't just sit around doing nothing all day ! This is a perfectly safe site!

By Jonathan Xu(it's not shoe), Fox Prown (he's not a fox), Alexander Belanger, Chris Byrd (he's not a bird), Logan Anderson, Roy Chung

Note: this is only the main page without the picture

Welcome to The Coffee Bean

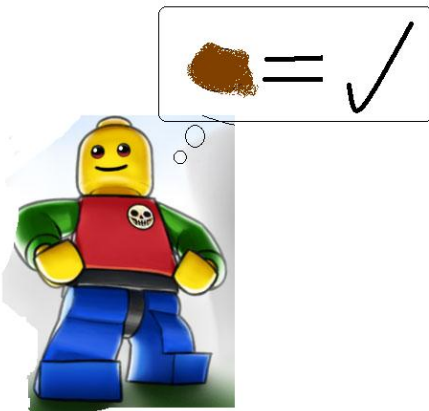

You can't have coffee without a coffee bean...

[Check out our new chat room!](#)

[We have a new page!](#)

Note: the brown thing is supposed to be a coffee bean.

Cookie Campaign

The cookie campaign is up, we have our groups now, and we have our Cookies, and finally we have our jobs. Speaking of jobs, the jobs are: Campaign Manager, Lead artist, Producer, spokesperson, and the moderator. Most people are happy but there can be some faults with people not liking there jobs but there is no really big deal. At least there is a bright side, we get to make commercials, poster, ect. So we have a hard job to do. There you have it, make the best commercial , and EAT COOK-IES!!!!

By Logan Anderson

The Flamingo

Hi everyone, and welcome to the new section of the Coffee Bean!
“Amazing Animals!” Today we’re going to talk about the beautiful, pink bird,
 the flamingo! This bird is a swimming and flying bird, just like the duck!

Flamingos eat mainly plants and crustaceans, but the baby chicks drink the
 dark red milk that the mothers and fathers produce for them.

Flamingos are wonderful birds and thankfully, they are not endangered.
 But, that doesn’t mean that flamingos are totally safe. Flamingos are still near to
 be threatened. The fate of the endangered and troubled animals is in the hands of
 the young children of the world. Also, lots of animals are dying or becoming en-
 dangered because their forest homes are being cut down for farmland and wood.
 So please, recycle more often, and plant a tree next to the sidewalk as a group of
 friends and do Mother Nature a favor. Thank you for reading and you’ll see more
 amazing facts next time, in the Amazing Animals article!
