

The Coffee Bean

We Love, We love, Recess!!!!

Recess is a very good friend for kids, but sometimes it turned us down. It mostly happens everyday, a break from all the hard work and stress. It also comes to us as a time where get to play with are friends and talk. We have even got the opinions from some fourth graders.

Wil: I think recess should be longer.

Alex B: I think there is to much arguing.

Julia & Jenny: I think it is not long enough.

Andrew: It should be longer on some days and some days it should be shorter.

This is the mouth of the fourth grade, but we will all have our opinions about the O so loved recess. It could always change but we will still have fun!
Always remember, We Love, We Love, Recess!!!!

Wisely Words

- *Always remember there is some one worse off than you.*
- *Humans are cruel, animals are crueller, it's just they don't do it as much.*
- *Life is like a vacuum cleaner, we always try the clean up our mistakes.*

ONCE UPON A TIME THERE WAS A BOOK SHARE

A long time ago, there were kids in School that were taught how to do book reports. The way for how to do book reports was lost thousands of years ago. **NOT!!!!!!!!!!!!!!** They probably didn't do book reports thousands of years ago, it was actually probably a dinky idea for kids to have more education. As we know most kids hate book reports. All you really have to do is, Step One: read a book Step Two: plan out what you are going to write. Step Three gather more information about book. Step Four: **write the book report.** Well that is actually the basic steps for a book report, for kids all those steps would sound like hours of hard work. But, your friendly newspaper has three quick solutions.

1. First, read a book. (again)
2. Ask questions about things you don't understand.
3. Finally write your book reports. (again for again)

This is actually for book reports at home so do not use at school.

(-: (-: One New Year, Some New Things :-) :-)

Hello people from 4th grade, we have already on the second year of this school year. Can you believe that! All the time we always think of lot's of cool stuff we want to get, well it's a new year and that equal's awesome inventions. All though Christmas just passed we're already might be thinking of this years Christmas. But toy's and gadgets aren't the only thing that's new. For a while now we have been doing a thing called Geography Bee it's like Spelling Bee's except about geography. In November we got pin numbers for our lunch, that's totally new and it wasn't even a new year. Next to that, the teachers have decided the world cup would be every year, so we going to be in it. It's like Fourth Grade is famous! First the turkey bowl and then the world cup. Now a days it's like we just keep on wanting to keep up with the fashion but it just keeps on changing. Let's just hope that we don't forget about our old things that we have and remember our blessings. It's a new year but it does not mean everything's changed (well are teacher's haven't changed at least). That's what's been stirring up this new year.
